EXPERIENCE

AMAZON | SOFTWARE DEVELOPMENT ENGINEER - I

Amazon Web Services | July 2022 – Present | Gurugram, India

- Contributing to the Just Walk Out (JWO) Tech team, facilitating friction-less shopping solutions across diverse stores and international markets.
- Owning E2E software development of large scale maintainable features and scaling current system's architectural designs.
- Led a two-person team in designing and developing an Infrastructure Library, which has been widely adopted across the organisation to expedite the setup of infrastructure, metrics and alarms management and related processes.
- Collaborated in a team of three to revamp and design a Media Obfuscation and Streaming Service with 99.99% availability. The service performs server-side obfuscation and watermarking before distributing videos to associates.
- Managed migration and deprecation of critical JWO services, reducing operational effort and lowering variable costs per unit sold.
- Provided on call support to the team once a week every month for 24 hours, to improve operational efficiency and resolve customer facing issues.
- Interfaced with Amazon Teams in Seattle to manage project dependencies through the project life-cycle.
- Translating business and functional requirements into concrete deliverables and building quick prototypes in partnership with technology leaders.
- **Tech Used:** Java, AngularJS, ReactJS, TypeScript and Amazon Web Services.

INNOVACCER | SOFTWARE ENGINEER INTERN (BIG DATA)

Data Activation Platform | Feb 2022 – July 2022 | Noida, India

- Worked in an Agile Development Environment in the Data Activation Platform Team to develop the production-ready micro-services for Data Standardization.
- Worked on different healthcare-data exchange format parsers, data-transforming pipelines, and utility/processing modules for terabytes of data daily.
- Worked on optimizing EMPI (Enterprise Master Patient Index) orchestration and data transforming pipeline that unzips archive data and puts it into the S3 Bucket.
- **Tech Used:** Python, Scala, Docker & Kubernetes, and Amazon Web Services.

INNOVACCER | SOFTWARE DEVELOPMENT ENGINEER INTERN

InAPI Platform | May 2021 – Sep 2021 | Noida, India

- Worked in an Agile Development Environment in the InAPI Product Engineering Team to develop production-ready FHIR-based data model micro-services.
- Responsible for RESTful API Design and Development, Documentation, Test Driven Development and Deployment.
- Created optimized and scalable Back-end services of Data Quality Report from ground zero, including APIs design and documentation, Unit Testing (90% coverage), API Development, JWT Authentication, and GitLab CI/CD pipeline.
- **Tech Used:** Django & Flask, PostgreSQL, and Amazon Web Services.

INTERNET BULL REPORT INC | SOFTWARE ENGINEERING INTERN

Product Development Team | Feb 2021 – May 2021 | Barcelona, Spain

- Developed and designed scalable web-based software solutions to solve complex business problems from scratch using Front-end and Back-end Technologies.
- Built and improved the UI/UX infrastructure and components of existing websites.
- **Tech used:** NodeJS, ExpressJS, MongoDB, VanillaJS, Bootstrap, and HTML/CSS.

CODING NINJAS | TEACHING ASSISTANT

April 2020 – Aug 2020 | New Delhi, India

- Conducted interactive discussions with students and assisted them through question clarification and simplified doubts of the students related to Java, Data Structures, Problem Solving, and Algorithms.
